Great, I presume they are pdf s then and emailable.

Thanks

They are actually reports from the state. What they did at which intervals, squeeze cement at which casing diameter, etc.

OK we'll pull the well work over reports...do you want us to load them somewhere special?

Ex. 6 - Personal Privacy then up to Dimock.

I really won't have a chance to use the info until late afternoon.

I should have some really interesting charts by the end of the week.

thanks
Rich

We have access to PA IRIS that probably has more information on the re-works.
I've got performance evaluations all morning. But Jim is in and I'll see if he can pull the drill records. Are u=you in the office or on the road??

Good morning Karen,

I spent a lot of the weekend charting analytical results and am seeing some correlation with drilling activity. I am relying on a spread titled "Cabot Gas Wells_PADEP_12_0314". It gives spud dates but does mention horizontal drilling or reworking. I have limited info on reworking or remediation from the Cabot presentation October 2011.

Do you have a more detailed database I can have access to?

thanks
Rich
